From the passion and experience for at least twenty years of the best engineers and technicians in the various areas of expertise born **SMART GREEN ALLIANCE**. While the passion amplifies the effects of our actions, the experience enables us to provide timely innovations that our customers needs. A company made up of people and not numbers, that promises to be a perfect partner to jointly achieve the goal of mutual satisfaction.

In the **SMART GREEN ALLIANCE**, each company specializes in the construction and / or management of the different phases of orders with particular attention to the research and application of GREEN technological and ecological solutions.

Products, Knowledge, Service & Solutions Maker - Total Environmental Solutions Provider

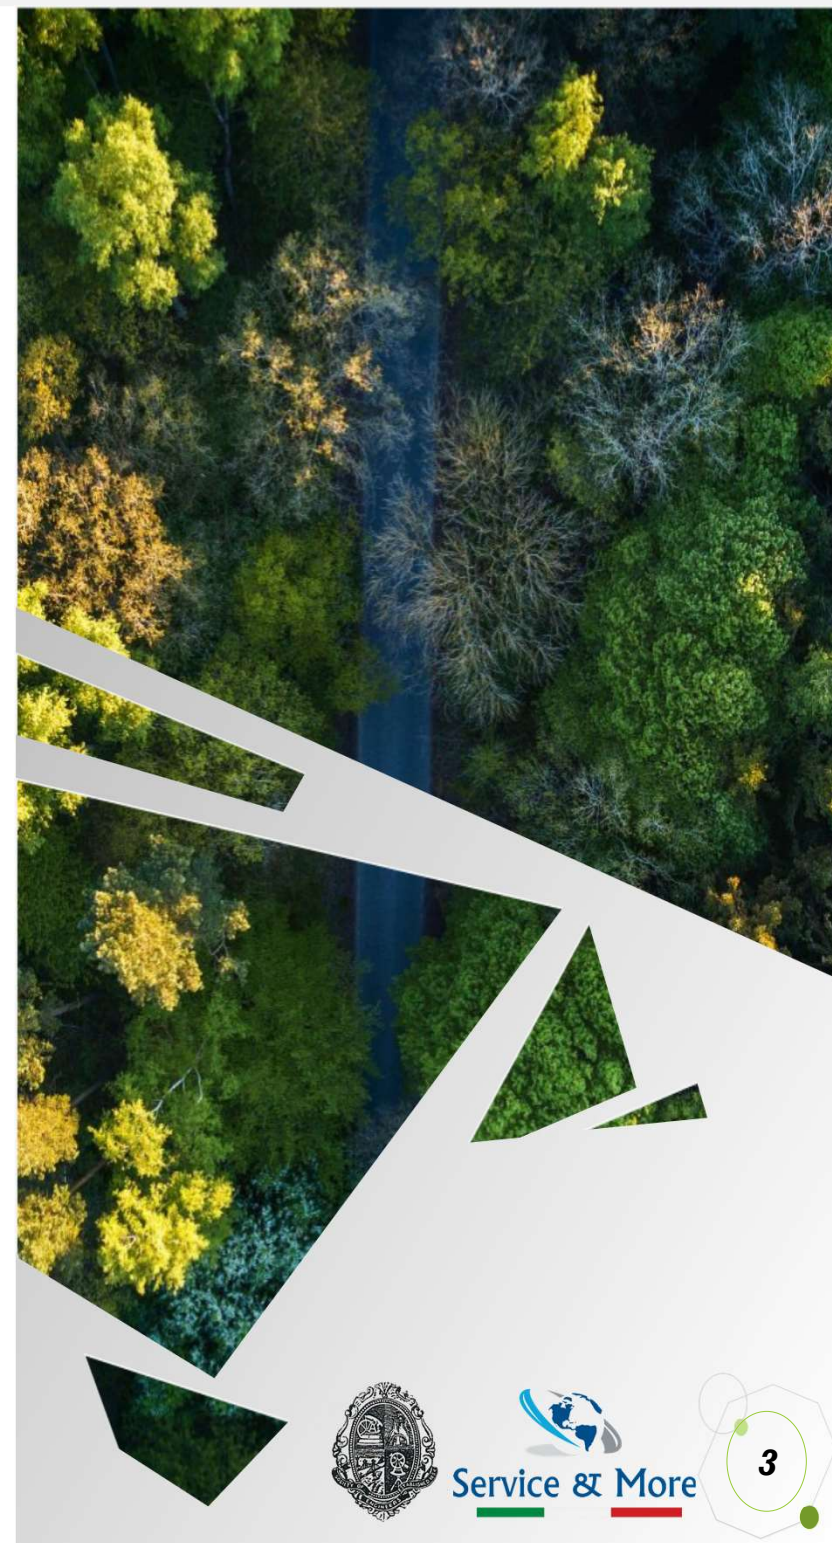

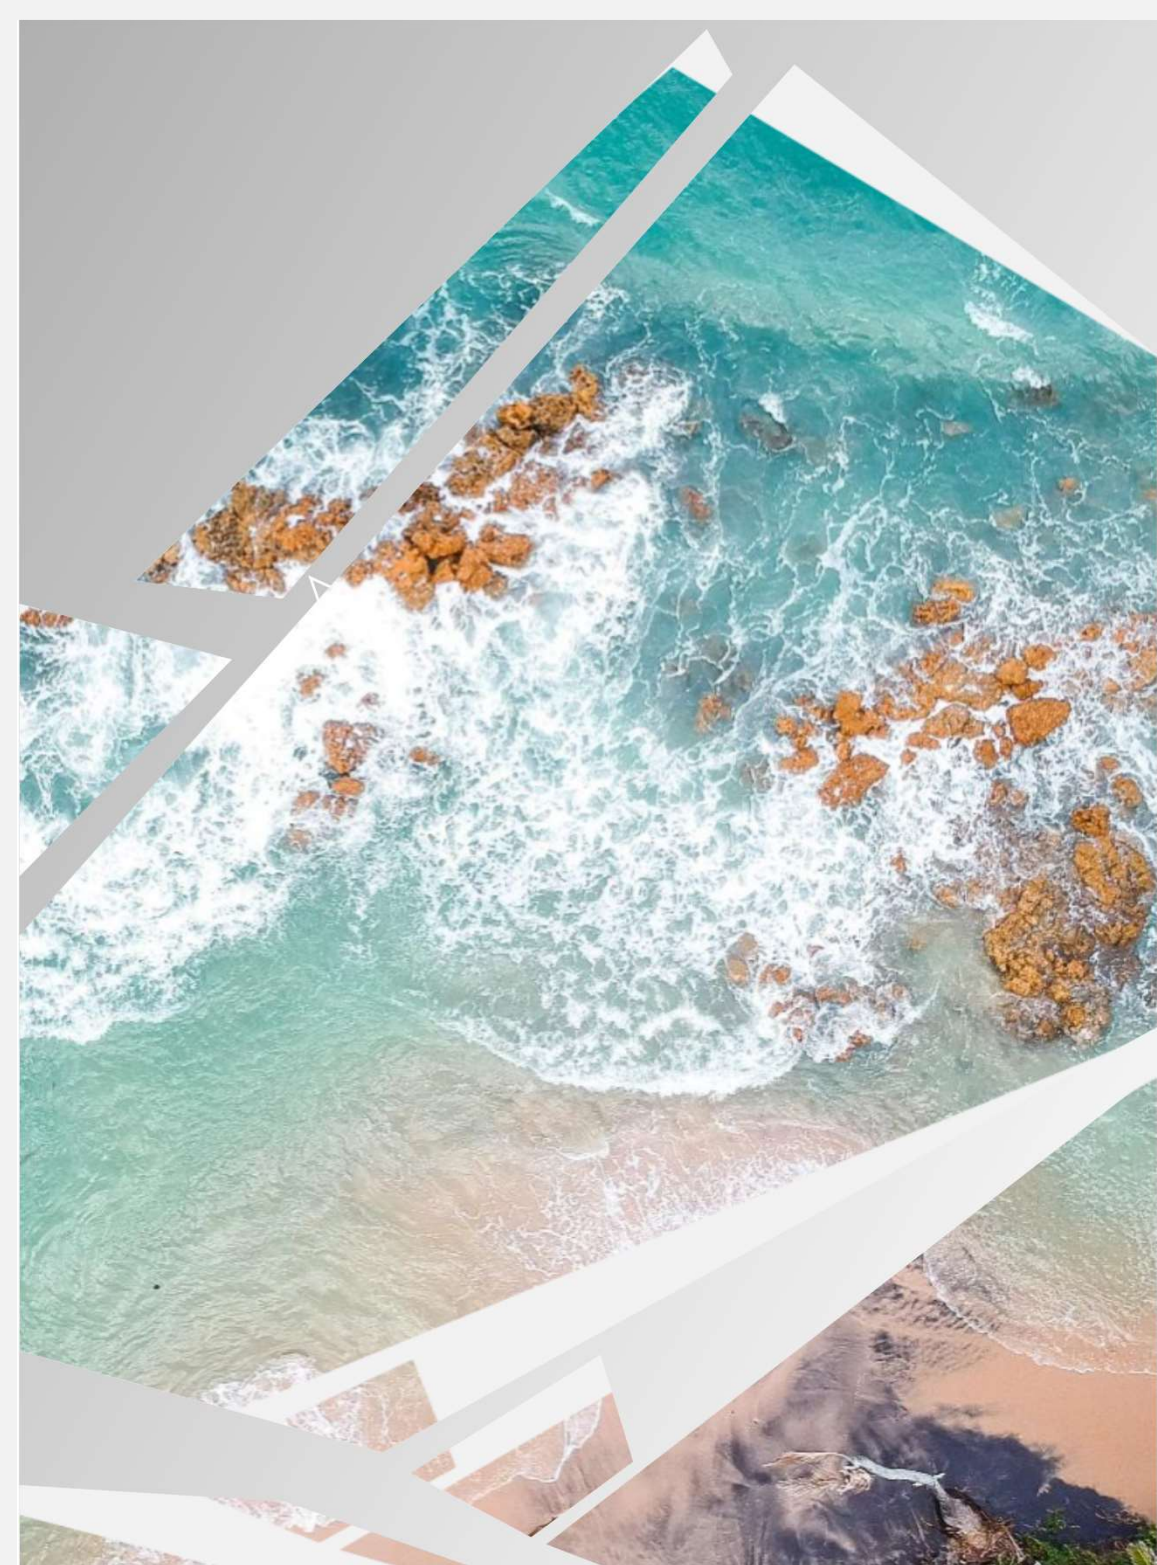

Vision

- ✓ We live in a world that consumes all the natural resources available for one year in less than six months and in which climate change requires a major reversal.
- ✓ We want to make the world a better and sustainable place, Sustainability before a desire is an obligation.
- ✓ Sustainability means giving a future to our planet, to the generations to come, sustainability has always been at the center of our business!
- ✓ We are constantly investing resources to reduce the effects of our products and work processes on the environment. With the careful analysis of the complete production cycle, we pursue excellence in the management of our company.

Our vision, simple, but bold.....

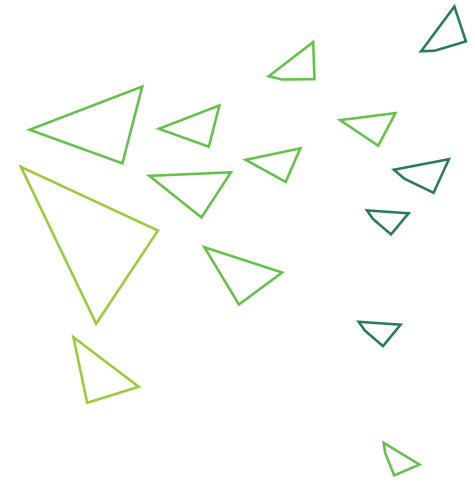

In a global world, where all companies are alike, the **SMART GREEN ALLIANCE** is committed to maintaining its personality, To do this, we try to strengthen the talent of all members of our company, from Design, Implementation, Sales and Service. In line with the spirit of our motto "People, technology, solutions", the customer is at the center of our attention and all his needs are transformed into practicable technical solutions.

Satisfied customers are our best marketing tool

It is precisely from the dialogue with customers and the enthusiasm generated collectively during each phase of the work that the best ideas are born. Collaborating, studying customized solutions, solving impossible situations is what makes us more than just a supplier.....

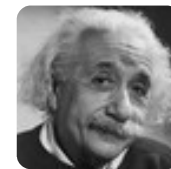

***“We can't expect things to change, if we continue doing the same things.
Crisis is the greatest blessing for people and nations, because crisis brings on
progress.***

Creativity is born from anxiety like the day is born from the dark night.

It's in crisis that inventive, discoveries and great strategies rise.

He who overcomes a crisis overcomes himself without being "Overcome".

Albert Einstein

SMART GREEN ALLIANCE

PL Engineering and Technology Ltd

Engineering company that researches, designs and develops industrial solutions related to ecology, energy and more.

As part of its activities, the Company acts as a systems integrator, usually acting as the **prime/general contractor**, managing the project for construction as a whole and taking on responsibility for this. Typically, while there are differences due to the strategic business area and product type, for each order the Group directly develops project management, design, hull procurement and manufacture, while its role mainly involves integration and coordination of a qualified network of specialized suppliers for the preparation of systems. In particular we are specialized in:

WTE with Plasma Technology

Industrial water treatment - Water and wastewater treatment plants

Service & More

Service & More S.r.l.

Service & More was founded in 2015 in the Packaging Valley with the aim of designing and developing advanced technologies for industrial automation. With a team of highly qualified engineers and technicians, specialized in industrial IT, process control and automation, Service & More has progressively consolidated itself as an advanced technological partner for industry leaders. Our goal is to become a partner of our customers by helping them to optimize the production. We are sure.....Together we can!

Service & More
